

RESISTANCE THERMOMETER (RTD)

TYPE OF RTD SENSOR

JIS C1604-1997

normal resistance value at 0 °C	class	measuring current	R100 / R0
Pt100Ω JPt100Ω	A	below 2 mA	1.3851
	B		1.3916

- Note :
1. R100 is the resistance value of the sensing resistor at 100°C
 2. R0 is the resistance value of the sensing resistor at 0°C
 3. JPt100 was abolished from JIS

TOLERANCE of RTD

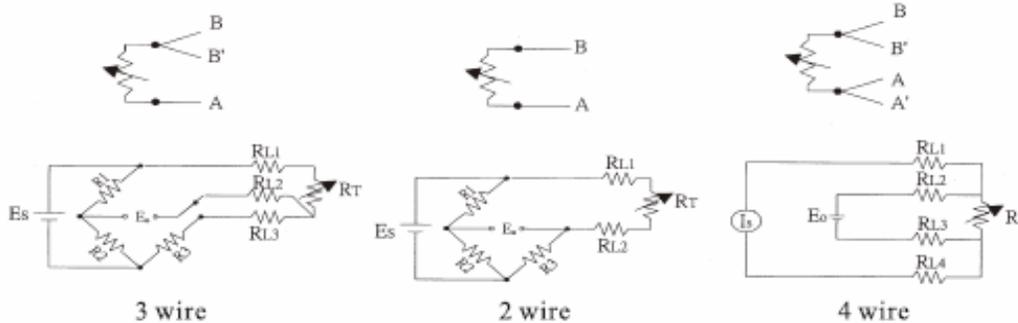

standard / symbol	JIS C1604-1997 IEC Pub.751-1983	
	class	tolerance (°C)
Pt100Ω R100 / R0 = 1.3851	A	+/- (0.15+0.002 t)
	B	+/- (0.3+0.005 t)

- Note
1. Tolerance is defined as the maximum allowable deviation from the temperature vs. resistance reference table.
 2. |t| = modulus of temperature in degrees Celsius without regard sign.

RTD TEMPERATURE RANGE

LOW TEMP: -200 ~ +100 °C	MID TEMP: 0 ~ +350 °C	HIGH TEMP: 0 ~ +600 °C
--------------------------	-----------------------	------------------------

WIRING METHOD OF RTD SENSOR

Two-conductor type:

Since a conductor resistance is added to the resistance value, it is necessary to reduce the conductor resistance in advance. This type is not usually used, except for a high resistance RTD's.

Three-conductor type:

Use to eliminate the effect of conductor resistance, care should be taken for long-distance transmission because a variation of resistance of conductors has an effect on accuracy. This type of connection is most widely used in industrial applications.

Four-conductor type:

This type of connection is used for high-accuracy measurement and standards because it is not affected by conductor resistance. Generally, a constant current is applied and the resistance value is measured by a potential difference.

MINERAL INSULATED RTD

1. wide application in measuring small diameter is very useful for the place where space is at premium .
2. quick response
3. easily bent for installation
4. long life span
5. excellent mechanical strength and pressure resistance

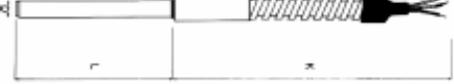

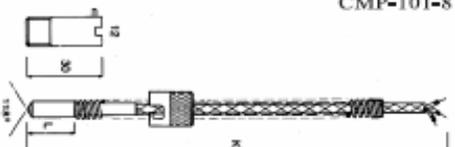

standard specification of AEROPAK[®] sheath RTD

	sheath (mm)			wire dia(mm)	maximum length(M)
	O.D	t	MATERIAL		
SINGLE ELEMENT 	Ø 1.6	0.25	SUS 316	Ø 0.25	100
	Ø 3.2	0.47		Ø 0.51	83
	Ø 4.8	0.72		Ø 0.76	35
	Ø 6.4	0.93		Ø 1.00	20
	Ø 8.0	1.16		Ø 1.30	11.5
	Ø 9.0	1.25		Ø 1.46	21
	Ø 12.75	1.8		Ø 1.50	10.5
